

About „JOON WOLFSBERG BAND“

The „Joon Wolfsberg Band“ is a breath of fresh air in a music industry suffocating in electronics and pop rock. Their music is a must have for true music lovers everywhere to wash away those bubble gum pop blues. It blends good old gritty rock right off the bat with a soulful blues vibe and whilst they are more often found tearing the place up, their 5 records show just how tastefully formed their music is. Only what is needed to get the job done is put into their songs. No excess baggage, no gimmickry or sonic frippery.

A magic that leaves wondering if the female front Singer „Joon Wolfsberg“ is possibly the lovechild of a secret affair between „Patti Smith“ and “Stevie Ray Vaughn“.

And whilst the band clearly tips their hat to earlier times and a more old school vibe, the songs are still the product of a modern band. They say that those who don't learn from the past are doomed to repeat it. Joon and her musical gang prove that it is by learning from the past that they get a hand in writing music's next chapter. A chapter that fans of music built on integrity, honesty and authenticity.
